Description

Hook and loop closure at the back allows for a more defined, snug adjustment. Back and side padding. (no front padding) Comfortably fits up to 21.5".

When putting the cap on for the first time, open the closure completely, please ensure the padding is over the widest part of your head, pull gently on the front visor to stretch the back padding to fit comfortably, then do up the hook and loop tabs.

Remember - when you first put on your new cap - or anytime it feels too tight - just pull on the visor to make it looser. You may need to do this the first time, occassionally, and any time after laundering.
